***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 34-39 and 50, drawn to a system, method and storage medium for sending electronic contents between buyers and sellers via a network, classified in class 705, subclass 37.
  - II. Claims 40-49 and 51, drawn to a system, method and storage medium for evaluating electronic contents and sending a result using evaluation software, classified in class 705, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as trading electronic contents between buyers and sellers and conducting a transaction. Invention II has separate utility such as using software for evaluating electronic contents. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in

the art as shown by their different classification, restriction of the inventions is required.
